1. What are the instructor's *best characteristics*?

Possionate about curriculum, open to questions and goes over what confuses you thoroughly.

2. What are the teacher's *worst characteristics*?

Doesn't always explain how he got to where he did on the board. Sometimes hard to follow.

3. How does this *instructor compare to other instructors* you had at NU?

Best math instructor yet. I struggled in his class but he was still an excellent instructor.

4. Do you have *any suggestions* with regards to the content and/or method of the course?

Take harder concepts a bit slower, other than that, nope!

5. Would you refer a friend to take any course taught by this instructor? Why or why not?

Sure, other people seemed to respond better to his teaching style so they would probably learn a lot.

### C. Open Response:

---

1. What are the instructor's best characteristics?

Brian is outgoing and friendly, he is always ready to help to make up missed quizzes.

2. What are the teacher's worst characteristics?

Explaining examples and new topics and turning to the board. The material written is covered by him, so it hard to follow

3. How does this instructor compare to other instructors you had at NU?

worse than I had

4. Do you have any suggestions with regards to the content and/or method of the course?

Be interacting with the class more.

5. Would you refer a friend to take any course taught by this instructor? Why or why not?

I would. Brian is a good professor, but the way he explains does not really fit me.

1. What are the instructor's *best characteristics*?

1) A lot of examples.

2) Enthusiastic

2. What are the teacher's *worst characteristics*?

1) Teaches word for word from the book, which makes it harder than it is. Other teachers teach shortcuts for some topics which we did not learn.

3. How does this *instructor compare to other instructors* you had at NU?

4. Do you have *any suggestions* with regards to the content and/or method of the course?

Professors in all classes should communicate as other professors provided much more extra credit going into the final.

5. Would you refer a friend to take any course taught by this instructor? Why or why not?

1. What are the instructor's *best characteristics*?

He's super willing to explain things &  
is available for extra help. Also very  
approachable.

2. What are the teacher's *worst characteristics*?

he can go a little fast in  
class, & sometimes when he presents material  
for the first time he can be a bit confusing.

3. How does this *instructor compare to other instructors* you had at NU?

Pretty good, overall very enthusiastic &  
engaging in class

4. Do you have *any suggestions* with regards to the content and/or method of the course?

Not really.

5. Would you refer a friend to take any course taught by this instructor? Why or why not?

Depends on their work ethic. It's a challenging course,  
but if they're willing to work they'll be fine.

### C. Open Response:

1. What are the instructor's best characteristics?

Brian is great at math, he is funny and makes an otherwise awful class <sup>into</sup> something I can enjoy, Brian is a good teacher and wants to see his students do well.

2. What are the teacher's worst characteristics?

Brian can be too smart for his own good on occasion. An example of this is that a lot of the time we will cover a concept that is easy for Brian but difficult for the students, and Brian does not always notice when he loses the class conceptually.

3. How does this instructor compare to other instructors you had at NU?

100 times better than my last calc professor

*Plan out how long for each part*

4. Do you have any suggestions with regards to the content and/or method of the course?

try and time out the class so you can slow down after writing a lot to give the class a chance to understand what is happening. it seems like the class goes nonstop sometimes

5. Would you refer a friend to take any course taught by this instructor? Why or why not?

100%. Yes, I really enjoyed Brian as a teacher and he made the class enjoyable when it would have otherwise

6. Additional remarks:
- have been terrible for me the issues I stated above are minor issues that I only mention because I think Brian wants to be a good teacher, and could maybe use the feedback. Overall it has been a great class even though I hate the actual material we cover.
